## EXPERIENCE

### **NELITO SYSTEM PRIVATE LIMITED New Mumbai, India — Software Engineer**

Jun 2022 - Present

Full Stack Java Development

ABSA BANK(Remote) Mauritius Limited

Robot Application

A robotic application designed to assist bank staff by automating reporting tasks. This application automatically moves files from a designated bank source folder to a specified system path, streamlining the process of file management and ensuring efficient organization of data.

HDFC BANK(Client side)

Work experience in banking domain solutions –  
Findart,Flexcube,Finacle,Ubsfcr,Ubsfcc. • Deployed applications on different environments like Tomcat server, IBM WebSphere according to customer requirements.

H2H (HOST TO HOST APPLICATION SOLUTION) | Nelito Head Ofc.

NPCI and member banks exchange NACH files, including financial transactions, recon, and settlement reports, using signing certificates. To enhance security, they're implementing encryption/decryption. For Bank to NPCI, the bank signs with its private key and encrypts with NPCI's shared public key. NPCI to the bank involves NPCI signing and using the bank's public key for encryption.

UNITY BANK (Thane,Mumbai – Client Side)

FINDART data archival banking system • Finacle 10X and Omni CBS Source, Finacle Treasury, CTS , Application Specific. • Functional Testing,Regression Testing,Integration Testing,User Acceptance Testing, • Data migration on the bank databases •Regularly Update and Patch The Microsoft Server Application To Ensure Security and Performance.
