EXPERIENCE

Maxdigi Solutions Pvt Ltd., Nashik— *Software Developer*

July 2023 - Sept 2023

- Received comprehensive training on MEAN Stack, GraphQL technologies.
- Resolved technical bugs, diligently upheld quality standards, and ensured the responsiveness of the application.

NCDEX e Markets Limited (NeML) , Nagpur— *Java Full Stack Developer*

Jan 2022 - Mar 2023

NCDEX e Markets Limited (NeML), is a comprehensive digital marketplace in India for commodities and intangibles, equipped with a nationwide network. This platform operates on a delivery-based e-markets system, making it an integral part of the country's e-markets landscape.

- Developed web pages to implement the Registration & Master module in the MasterApp(migration of e-Auction app), using Angular, Spring Boot.
- Maintained and regularly improved the code of the e-Auction & Krishivedh application, ensuring its smooth deployment on testing and production environments.
- Actively participated in the code enhancement of the NIT lottery application, successfully resolving bugs.
- Assessed requirements specified in existing documentation and actively collaborated with Business Analysts (BAs) and Quality Analysts (QAs).
- Employed Jenkins, DevOps, and Agile principles to enable continuous integration and continuous deployment (CI/CD) for the web application based on war files.
- Worked with Microservices architecture and developed REST APIs.
- Implemented the solution for complex backend logic in eAuction project by conducting a thorough analysis of code performance standards and improving overall performance by 30%.
- Helped junior team members in solving problems.
