PROFESSIONAL EXPERIENCE

Software Developer

Futurense Technologies

03/2023 - 10/2023 Bengalore, KA

Worked on all aspects of the software development lifecycle for java -based and RPA applications. Analyzed user requirements, conceptualized system features and defined application functionality, contributing to design, implementation, and maintenance phases.

- Attending daily Scrum meeting
- Implemented web automation and Excel automation using AA 360,increased data accuracy by 95%.
- Using **Spring Boot** and designed and developed applications with the guidance of our architect.
- Effective team player with strong problem -solving and interpersonal skills.
- Ability to work independently when required.

Java Developer

TechTree IT System Pvt

05/2022 - 01/2023 Bengalore, KA

Contributing to all phases of the software development lifecycle, including design, implementation, and maintenance of Java-based software and applications. Analysing user requirements, conceptualising system features, and defining application functionality are part of our process.

- Learned **Spring Boot** and designed and developed applications with the guidance of our architect.
- Integration of **Logger** with Spring Boot Application.
- I have good hands-on experience on developing Web Applications using J2EE
- Hands-on experience on Tomcat Web Servers.
- Knowledge on Eclipse Tool for the development of java projects.
- Cohesive Team worker, having strong analytical, problem solving and interpersonal skills
- Ability to work independently when required.

PROJECTS

National Stock Exchange (NSE)

Contributed to a pivotal project on the National Stock Exchange (NSE), playing a crucial role in the development and maintenance of a sophisticated three-layered system. My primary focus was on the 2nd and 3rd layers of the architecture.

- Designed and implemented API gateways responsible for building, validating, and authorizing client requests.
- Utilized Automation Anywhere 360 (AA 360) for web automation, scraping, and downloading essential data.
- Implemented bots to filter and process data seamlessly, enhancing overall system efficiency.
- Integrated the automated process to trigger email notifications using APIs, ensuring timely communication with clients.

VIYA-WASL

Tech Stack: Java,SQL, Spring Boot, Hibernate, Manual Testing

- Viya is an e-commerce and lifestyle project based in the UAE. It includes golf course booking, hotel, dine booking.
- It also has an academy of golf to tutor the beginner golfers. Furthermore, it has its own e-commerce platform called as Pro shop where the golf related items are listed.
- The main thing about this project is loyalty points for every transaction made with this Application.

SUMMARY

Looking for a challenging and growing career where I can use my skills to contribute to the organization. Eager to learn and work as part of a team in an enthusiastic environment, using my technical skills to achieve company goals.
